Support for Our Microsoft Dynamics GP Clients

Business Ready Solutions, LLC is proud of its extremely responsive, outstanding support for our clients. Our expertise extends far beyond technical competency. Business Ready Solutions' approach to client support involves solving our clients' business needs from both a finance and technology perspective. Our support methodology is successful because we work hard to understand our clients' technology problems, recommend solutions that make the most sense for their organization's use of Dynamics GP, and consider their schedule and budget. We work closely with our clients to solve all problems expediently and thoroughly.

“In our business, everything is urgent and time-driven. We don't have the luxury of delaying revenue for local businesses and tax revenue for the community. One of the great things about Business Ready Solutions is they understand that, and when we have problems that prevent us from getting our job done, they are extremely responsive.”

**Shelly Green, President & CEO
Durham Convention &
Visitors Bureau**

Our team has over 40 years of combined experience in accounting and finance. We've successfully implemented over 250 business management systems and have provided excellent support to many satisfied clients. Business Ready Solutions' quick response time with clients is exceptional. We've helped our clients maximize their technology investment and get the best possible results from Microsoft Dynamics GP.

Client Support Program

Our client support is available whenever and however you need it:

- ✓ Telephone support
- ✓ Online technical support
- ✓ Onsite training and support

More Benefits for Our Clients

- ✓ Free webinars that review features, functions and modules of Dynamics GP, as well as topics of interest to finance professionals. Webinars offer one hour of CPE Credit.
- ✓ Monthly e-newsletter that includes company and Dynamics GP news, information, best practices, and articles of interest to accounting and finance professionals.
- ✓ Annual review of their Microsoft Dynamics GP service plan and consulting engagement with Business Ready Solutions to ensure we are serving their organization to the best of our ability, and that the optimal Dynamics GP road map is in place for their business.
