Microsoft Dynamics GP

Choosing accounting and ERP software for the first time, or replacing systems, is a big decision you should only have to make once. You can be confident Microsoft Dynamics GP is the right decision for your company.

"With Microsoft Dynamics GP, our employees are more productive and efficient. There are so many good functions in Dynamics GP like SmartList, which lets us go in and pull information quickly even if we just want to look at one account or one journal entry. I think Dynamics GP is easy to use and relatively intuitive concerning retrieval of information from the system."

Jane Gilpin, Controller
1-800-Pack-Rat

"I estimate Microsoft Dynamics GP saves us a blended salary rate of \$60K per year and five days a month in time in our accounting department."

Kevin Johnson, CFO
Carillon Assisted Living

Microsoft Dynamics GP is a comprehensive ERP solution that goes beyond basic business management and reporting to help your people work faster and smarter. Right out of the box, you can meet unique business needs, automate business processes, and adapt your solution easily and cost-effectively today and as you grow.

Tailored to specific roles, designed for how your people really work, and customized for how your business really runs, Dynamics GP seamlessly integrates with other systems. It looks and feels familiar to software you use every day – Microsoft Office Outlook, Word, and Excel – so your people can work more productively with a solution they want to use.

Microsoft Dynamics GP has powerful business intelligence and reporting capabilities that give you the detail-rich information you need to thoroughly understand your organization and make more informed business decisions.

Business Ready Solutions has successfully completed hundreds of Microsoft Dynamics GP installations for small and mid-size businesses across a wide range of industries.

Our experience and expertise with accounting, business

process, and Dynamics GP gets you up and running quickly so you can realize increased value right away and your employees can be as effective and productive as possible.
